

José Augusto Accorsi, Software Engineer

Dois Irmãos - RS, Brazil, +55 51 995906720, augusto.acorsi@gmail.com

PROFILE

Seasoned Full-Stack Engineer with expertise in building resilient microservices and scalable UIs using Java (CAP), JavaScript (SAPUI5), Node.js, and Spring. Experienced in Agile and Scrum methodologies with a strong focus on DevOps culture. Adept at leading integrations and driving seamless user experiences across procurement, finance, and supplier management systems. Passionate about innovation, full-stack development, and collaborative problem-solving in fast-paced environments.

EMPLOYMENT HISTORY

Dec 2021 – Present	Senior Software Engineer, SAP Labs Latin America São Leopoldo - RS
	Full-stack developer in a brand-new SAP application called Category Management. The main Technologies used are JavaScript with SAPUI5 and Java with CAP. This involves crafting microservices using a technology stack that includes JavaScript, Node, Java, Spring, and CAP. Our development approach adheres to the principles of agility and scrum methodology, while also championing a DevOps culture to foster seamless teamwork and ongoing enhancements.
	Assist the team in implementing the Deploy with Confidence (DwC) platform from SAP, empowering them to achieve daily production deployments with confidence.
	Supported SAP Ariba Launchpad integration, ensuring smooth user access and role configuration. Contributed to the successful deployment and management of CDM (Common Data Model) content, improving system alignment and user experience across procurement and supplier management processes.
Mar 2017 – Dec 2021	Software Engineer, SAP Labs Latin America São Leopoldo - RS
	Integration of Tax Service into S/4 HANA, localizing business scenarios to support tax calculation.
	Develop a feature to manage any kind of queue for a Chatbot @ Slack.
Sep 2015 – Mar 2017	Software Engineer Intern, SAP Labs Latin America São Leopoldo - RS
	Localization of SAP Banking Services.
	Visual Harmonization, a project that had as its objective harmonize the WebGUI screens, making it user friendly.
	Google Chrome extension for Visual Harmonization project.
	Front-end developer with JavaScript and SAPUI5 for a company side project called Innoweeks Retail team solution.
	Simulation UI project, a project with SAPUI5 for Integration of Tax Service into S/4 HANA.
Feb 2015 – Sep 2015	Software Engineer Intern, e-mine São Leopoldo - RS
	Helped with the development of customer websites, using Angular JS and .NET.
	Create an Application for Windows and Windows Phone OS to read bar code using C#.

EDUCATION

2015 – 2021	Bachelor in Computer Science, Universidade do Vale do Rio dos Sinos São Leopoldo - RS
	Final Theses: “Hybrelastic: A Hybrid Elasticity Strategy with Dynamic Thresholds for Microservice-based Cloud Applications”. A full-year work on cloud elasticity in microservices-based applications, which was crowned with a high-grade approval.
2010 – 2014	Electronics Technician, Fundação Escola Técnica Liberato Salzano Vieira da Cunha Novo Hamburgo - RS
